**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 16-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Panusopone et al. (US 6,647,061 B1).

Re claims 1 and 16, Panousopone discloses a transcoding apparatus of performing conversion between compressed bitstreams having at least syntax elements and video elements corresponding to video data, the transcoding apparatus comprising:

a decoder for reconstructing syntax elements and video elements from a first bitstream complying with a first compression method (304 of fig. 3);

an inverse quantizer (330 of fig. 3) for inverse-quantizing the video elements provided from the decoder according to the first compression method to reconstruct video data; a quantizer for requantizing the video data according to a second compression method;

a syntax generator (308 of fig. 3) for mapping the syntax elements provided from the decoder to syntax elements complying with the second compression method; and

an encoder for encoding the requantized video data (video elements complying with the second compression method) provided from the quantizer and the syntax elements provided

Art Unit: 2613

from the syntax generator according to the second compression method, thereby outputting a second bitstream, MPEG-4 BITSTREAM (340, 350, 360, 370 of fig. 3).

Re claim 17, Panousopone further discloses wherein the first compression method is a moving picture experts group (MPEG)-1 or MPEG-2 compression method, and the second compression method is a MPEG-4 compression method (fig. 3).

***Allowable Subject Matter***

3. Claims 12-15 are allowed.
4. Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wilkinson (US 6,160,844) discloses a processing digitally encoded signals.
